

The INTERPROF-TECH project at a glance

What does INTERPROF-TECH offer me?

- Active assistance in **finding a job** that matches your qualifications
- Development and enhancement of important **workrelated and cross-cultural skills knowledge**

How can I participate in INTERPROF-TECH?

You need:

- at least one **foreign university degree in the STEM area**
- **Residence and work permit** in Germany
- Residence in **Baden-Württemberg**
- **Good knowledge of German** (at least B1)

The INTERPROF-TECH project is part of the **Baden-Württemberg „Integration through Qualification (IQ)“** funding program and is funded by the Federal Ministry of Labour and Social Affairs and the European Social Fund. Participation in the project is **free-of-charge** for the participants.

Since the start of the project in 2013, INTERPROF-TECH has had a very good placement rate of international professionals into the German labour market.

The „Integration through Qualification“ support program aims to sustainably improve the labour market integration of adults with a migration background. The program is funded by the Federal Ministry of Labour and Social Affairs (BMAS) and the European Social Fund (ESF). Partners in the implementation are the Federal Ministry of Education and Research (BMBF) and the Federal Employment Agency (BA).

I am interested.
How can I apply to INTERPROF-TECH?

- Communication in the company and in meetings
- Teamwork
- Making professional phone calls & writing e-mails

5. Intercultural Competence

- German working culture
- Intercultural communication competence

Organisation

**But I live far away from the BEN Europe Institute.
How can I organize it?**

Job Coaching:

A job coach will also advise you on all questions concerning your job search individually.

E-Learning-Program:

95% of the content of the project is designed as e-learning training. Therefore, participation in the project is possible from all over Baden-Württemberg.

Networking:

During in-class events in Ettlingen, you will have the opportunity to exchange ideas with colleagues from your field of specialisations.

Flexibility:

Thanks to individual coaching, the project can be taken up at any time.

Comments of the participants about INTERPROF-TECH

„That’s exactly what I needed, e.g. the subject-related German course. I found the flexibility provided by the online support very helpful. I would have liked to have done more (from German course and in-class events), however, after I had found work, I didn’t have so much time left.“

Nataliya Sorokina, Technology Manager from Russia

„I think it was the best course I have ever taken in Germany. The best part of the course was the online support, because I didn’t waste time commuting. My supervisor was very nice; we found an internship for me in a short time. The corrections of my applications helped me a lot. I would recommend the project to anyone at any time.“

Arya Mussa, Civil Engineer from Syria

„It was very convenient to learn German via the Internet. Adobe Connect was great because you can do a lot with it. The teacher was well-experienced and spoke excellent German. The webinars on the application documents, such as writing cover letters, were also great.“

Olena Artemenko, Systems Engineer from the Ukraine

„I got a lot of support and learned a lot of things that I should know. My supervisor helped me a lot and advised me well. I am totally satisfied. All employees were very friendly.“

Sayed S. Shafiqullah, Civil Engineer from Afghanistan
